Advantage Line

The choice you always wanted.

Priced to fit a limited budget, Advantage Line systems from Bosch offer you the perfect cost-performance choice for smaller installations. They combine professional security features with affordability, making them ideal for places such as retail shops, convenience stores, restaurants, small offices, daycare centers and schools.

Available from your local distributor, choosing the right-fit solution has never been easier. Advantage Line offers just the right amount of features for your application while delivering the same high quality and reliability as high-end Bosch systems, along with the same standard three-year warranty.

Unfamiliar with security systems? No problem! Whether you're an installer or end-user Advantage Line is designed with you in mind. Quick and easy set-up, intuitive menu-driven interfaces and helpful features save you time, frustration and money.

The Advantage Line portfolio covers all your security needs, including analog and digital CCTV cameras, video recorders, public address systems, and fire panels and accessories.

Advantage Line, the choice you always wanted.

Advantage Line

Video systems

Advantage Line covers analog, IP network and HD (High Definition) CCTV systems, all offering great value for money. Analog solutions make perfect standalone, non-networked systems and ensure excellent image quality in difficult lighting.

Or you can go digital with our IP network cameras, which include HD solutions, and offer additional benefits such as Bosch Video Client (BVC) viewing and playback software. And to manage your systems you can choose from our range of high performance video recorders.

IP Cameras

The IP 200 Series cameras deliver high-performance Bosch technology in cost-effective, ready-to-use solutions. Complete network video surveillance systems, they include video recording and storage in a fixed-body or dome housing. All cameras are ONVIF compliant.

Box Cameras

These compact fixed cameras offer a complete network surveillance system with progressive scan for sharp images of moving objects. They are ideal for monitoring indoor areas in retail shops, restaurants, daycare centers and small offices.

IP 200 Series Box Cameras

- NBC-225-P IP Camera**
VGA fixed lens 4.9 mm, F2.8, PoE, 12VDC 1A
- NBC-255-P IP Camera**

Video solutions

You can combine Bosch Advantage Line products to create complete systems that are easily installed, expanded and upgraded. We pay extra attention to compatibility between system types and product families to enable integrated solutions. It is of course also possible to use a smaller or larger number of components.

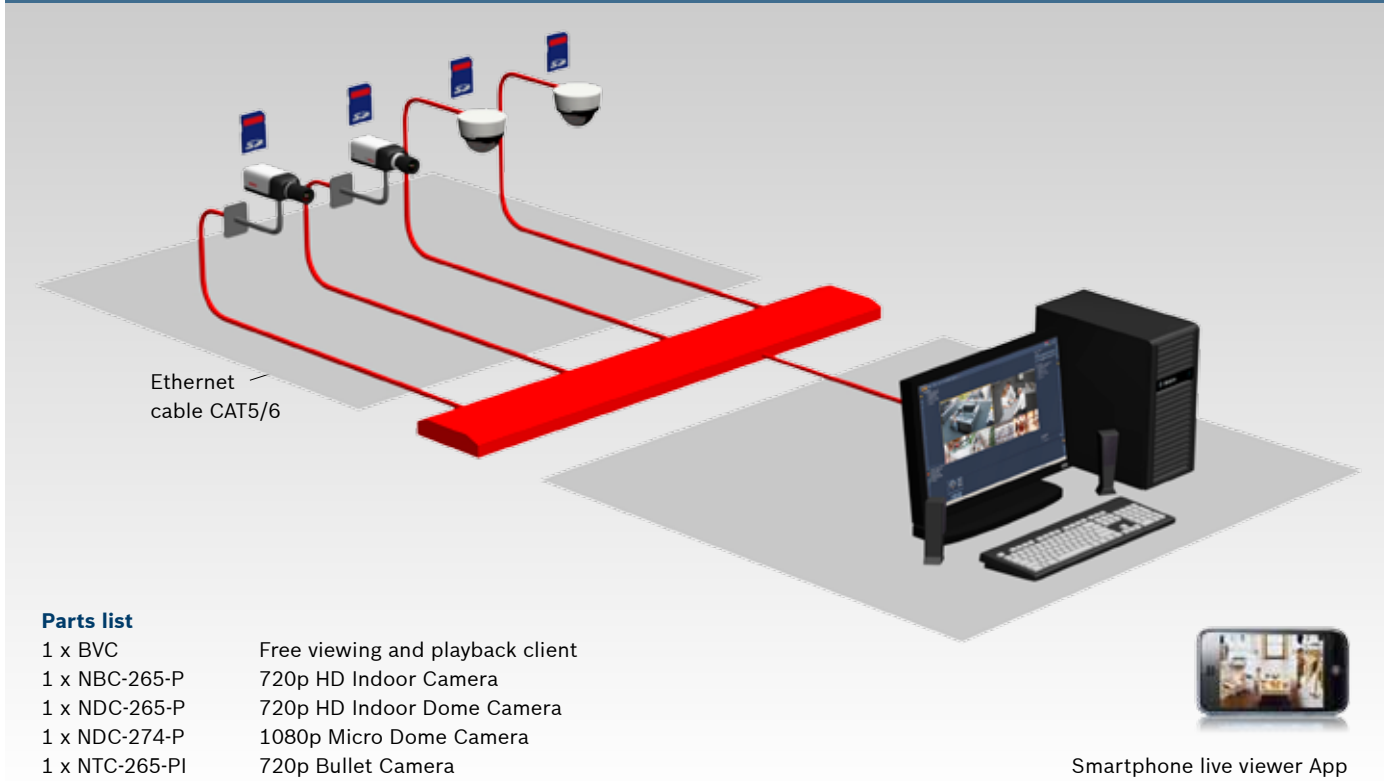

Typical small analog solution

Small shops, retail stores, pharmacies, and gas stations are often lacking image quality when it comes to professional CCTV systems. On this particular solution we have used the DVR 400 Series together with outdoor Minidome cameras, outdoor bulletcameras and Indoor Minidome. With this solution you get some great imaging quality both day and night at an affordable price. The DVR comes with features such as smart phone support and web interface.

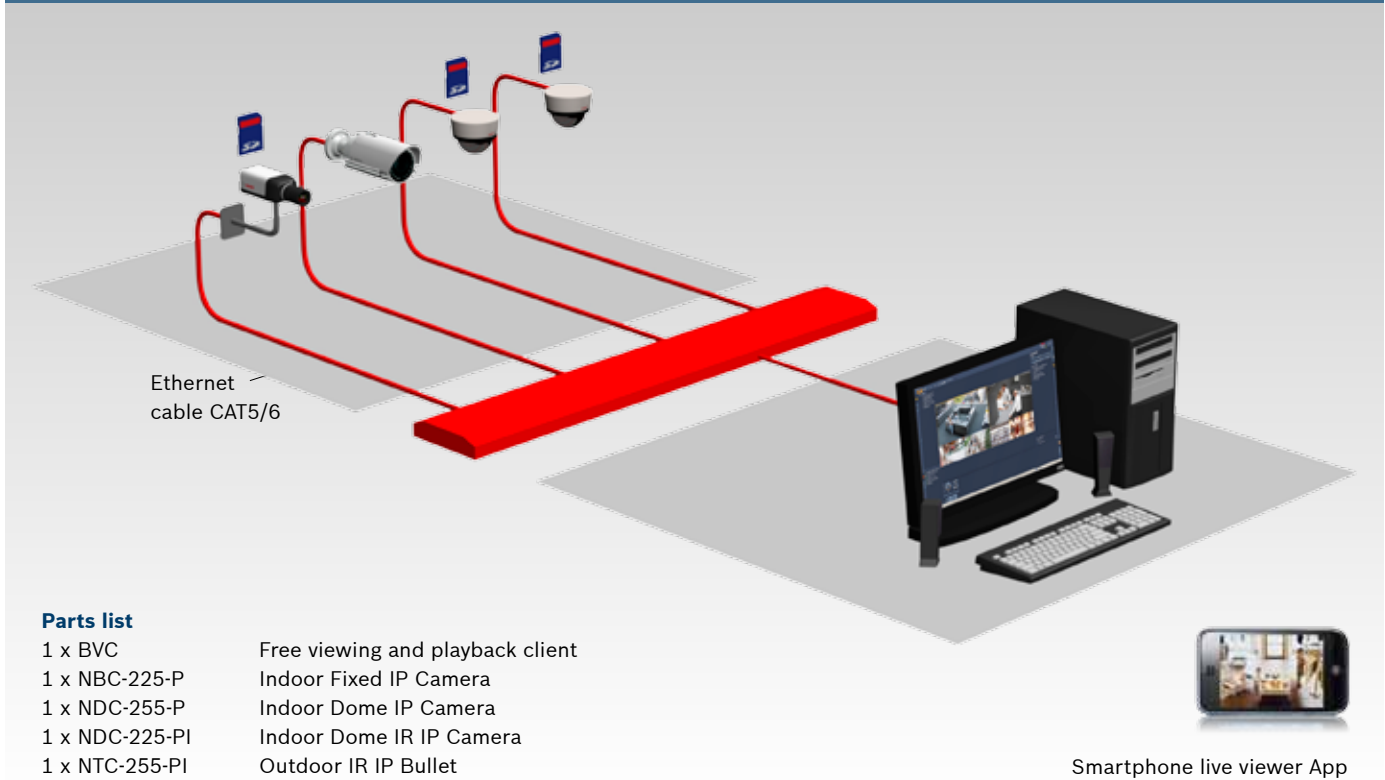

Typical small IP HD video solution

The IP 200 Series cameras are now available in 720p and 1080p HD image quality in both dome and fixed-body types. In addition to all the great features you get with IP 200 Series solutions, the HD cameras capture more details and have a wider field of view. They reveal far more information, allowing more detailed examination of your recorded video.

Typical small IP video solution

The IP 200 Series cameras are simple to set up. POE compliance enables a single cable to carry the camera's power and video, saving installation time and cost. Once configured, the camera can be disconnected from your PC as the video is stored on the local removable SD card. When evidence is needed the card can be reviewed on any PC. (not NTC-255/265-PI)

Pure simplicity.

Bosch Advantage Line let you offer your customers high quality products at a price you can afford. They are also exceptionally easy to install and operate. Everything from their physical design to the powerful software has been designed for simplicity, ensuring fast, simple set-up to save you time, effort and costs. End-users will also find them straightforward and smooth to operate. Simple, intuitive operation means you will need far fewer visits to help or train confused customers.

Easy installation as ABC

Bosch Advantage Line feature Bosch quality through and through. Designed and tested to the highest standards, they include refinements that make installation and operation smooth and easy. All Bosch small business solutions are covered by our professional standard 3-year warranty. But with a high reliability factor, you won't waste time on servicing. Their extremely low maintenance requirements results in further cost savings for both installer and end-customer. All of our production plants worldwide rigorously apply our high standards of quality and have implemented ISO9001-compliant quality management and ISO14001-compliant environmental management systems.

Clear-cut quality

Bosch Security Systems is known for the high quality of its products, that expertise and experience has now been focused on the medium price market. Now for smaller budgets there is no need to compromise, you can get Bosch quality products usually specified in the world's most critical security projects for smaller installations at a price to suit your budget.

Logistical excellence

Bosch Advantage Line products are directly available from master distributors in your neighborhood. Check the dealer locator at our website to find your distributor.

Advantage Line

CCTV

Delivering reliable, long-lasting performance at a competitive price, Bosch Advantage Line products combine great quality with the lowest maintenance needs.
